INTRODUCTION

The place where life is learnt in a way of rightful approach of sharing and caring is the premises of Dolphin Magic School. The vivid sound of innocence and mesmerizing beauty of heart which seek love and light make “Dolphin Magic School” one of the blessed places to be.

ACTIVITIES

Friday Activities

Dolphin Magic School not only focuses on the teaching methodology but also enhances students to develop their body and mind through various Friday activities. Children from all class activity participate on various creative and productive activities. This helps them practice the upcoming obstacles.

a. Quiz

The word spelling context, General knowledge and beautiful participation of students makes Quiz Contest, always a wonderful activity to be done in Dolphin Magic School. From Class 2 to 5 participate on this activity. We created groups and group played contest with their friends.

b. Handwriting Competition

It is said in Psychology that handwriting of a person resembles the personality of that person. To build the positive attitude towards writing skills DMS organized the handwriting competition, which helped children to bring forth their eagerness on writing skills. It was held class wise and winner were also as per class wise basis.

c. Marathon

Physical stability gives mental healthiness and mental healthiness gives strong attitude towards study and everyday life. DMS is not only focused on quality education but also other life supporting activity which really comes handy at the time of need. From class one to class five children actively participated on Marathon held during Friday Activity.

Such a joy and activeness we could find on the faces of children. Marathon was great success to students and those who have come strong and winning will be rewarded their achievements on school day on March.

d. Singing Competition

Music is important part of life. In Dolphin Magic School, we celebrate music twice a week on Thursday and Friday. In a thought of exploring music and vocals within the children, DMS organized singing competition as per the school calendar was planned.

e. Gardening

Agriculture and farming has become a trend in our school. Children don't only eat; they also know where the food comes from. They are also learning how to grow crops on their own. This way of involvement also helps children to relate their studies to practical life. Pictures speak for themselves.

Result & Performance

Students' performance in exams and classroom activity has been really improved. They are securing good marks in the Performance test and First Terminal Exam. The result has been declared and handed over to parents.

It is really good news that over 90% of the students secured good marks and rest of students are doing good under the supervision of teachers. Extra classes are being offered to any student for improving their studies. The overall result of students for first terminal has come good.

Individual Report from Class Five

Pemba Tamanag

He is one of the most intelligent student of the school. He used to read in class 2 in the previous year. But as per his understanding level, we decided to advance him to class five directly instead of class 4. He quickly adapted to class 5 and is doing really good than most of the regular student of the class 5.

He is a regular student of class 5. He regularly does all his assignment and is barely absent in the class. He is interested in sports and participates in all kinds of extracurricular activity. He has a very good potential on physical as well as mental aspects.

He learns quickly and adapts to change much faster. Though his family background isn't very impressive he has made the most out of our school opportunity. Pemba has been living in Bird's Nest since 4 years and studied in DMS ever since.

Manoj Tamang

He is student of class 5. He is able to keep good relationship with his friends. He always shows a good respect towards his teachers and instructors. He is loving and caring for his youngsters in school. Though he is bit weak in studies than other students, he has good discipline in class. He is also the one who is most absent among the five in class.

Manoj try and concentrate while in class on the day he is attending school. According to Rewant Bhandari, music teacher of DMS, "Manoj actually is brilliant in music and learns fast. The only problem is that he's missing out on classes."

Manoj has a weak family background and his parents have drinking problem since long and still continuing so negligence at home could be the problem for his absence in school and performance in his studies. He also has a small brother Manik, He is four years old and seem to have lack of learning and physical growth like normal children. His brother is currently studying at DMS as a playgroup student.

Prakash Basnet

He is brother of Akash Basnet and Dipash Basnet who also study in Dolphin Magic School. His mother also works in the school helping in the kitchen. His father is paralyzed and cannot work for family. Despite Prakash's poor family background he is regular in school. He is a well mannered child in school and also does his assignment in regular basis. His scores in the exams are more than good. He also is active in sports and has participated in every outdoor sports so far. He is keen in music and attends all the music classes.

Sabina Tamang

She has been living in Bird's Nest since last six years. She is very interested in dance and arts and participates in every cultural program organized in school. She speaks good English and is punctual in school too. However her study isn't as improved as it once was. Sabina seem to lose concentration while in class and also have less satisfying marks compared to others in the class. Overall Sabina is doing well. She is an excellent dancer and good student. She should be able to make her studies better with the help of the teachers and the extra classes on DMS.

Sanju Tamang

She is now 13 years old and has been living in Bird's Nest since 7 years. Sanju is very smart and is the best scoring student in her class. She does her assignment regularly and attends school every day. Not only at class but on all the activities that's held in DMS, Sanju participates. On sports week last season, Sanju won badminton and table tennis competition. She is also an excellent dancer and has danced along Sabina in almost every cultural program. Sanju is quite a bright student and has a great potential in her life as she keeps learning more every single day.

Solar Installation in DMS

Nepal has been suffering from load shedding since many years. It was really important for our school to be independent on electricity. There are so many important works in school such as printing, using the laptops, filtering the water, refrigerator etc. For all of these needs , our school installed Solar system which will continuously support the needs of school without being dependent on local electricity. This is one of the greatest achievement of all times for our school.

Uniform and attendance

Uniform is the basic means through which everyone recognizes the students. It also unites everyone into one realm. This academic year our students have got new uniform for Friday and Tuesday. It is green for girls and blue for boys. To encourage students to come to school regularly being neat and tidy, every end of the month teachers select the outstanding students and give them special cards which encourage others to become tidy. We hope this way will help maintain a good school in habit.

Now, students are more regular as well as neat and tidy. Besides there is speak in English rule in classroom and it is getting better every day.

Monsoon Vacation

Monsoon is the rain of hope for many people in Nepal. It is because most of the people are dependent in agriculture and they totally depend in monsoon to cultivate their crops. Monsoon not only is a hope but also a terror. It flooded over 80% of the land in plains of Nepal and most importantly it also swept away our school's playground. It is not only monsoon to be blamed but also whoever constructing and planning to build those supporting walls which were missing proper drainage system. All swept away, the debris were deposited down in the main traffic road. The main road was blocked and it took more than 3 hours just to be able to make a temporary passage for the traffic.

We called the digging machine to clear the way and traffic was normal after a week. Since the main way to school was blocked, hired workers from Arjun (contractor for construction in DMS) constructed temporary stairs so that the children and the teachers can easily come to school. Meanwhile local people also use the same way to go to Pharping and come home. Now again we will have to start from the beginning. This time it should be strong and well constructed. After this incident, school is completely safe and there is no problem regarding landslide anymore. No one was injured during this incident and school was closed for monsoon vacation. Vacation started from 17th July, 2016 to 31st July and school is now running normally.

What teachers have to say

Keshav Khatri

Dolphin Magic School is renowned educational institute over here since 2010 for quality education and true learning. In my short teaching period (about one year), I found that kids are showing good discipline and respect towards teachers and love their youngsters' too. DMS is not only providing quality education, it is also helping to develop children's social development and Psychological development. And I have felt it is improving every day.

I teach English subject. Children are quite good in English speaking and writing as well. Children are speaking English during school hours in the school premises. I am also satisfied with the children and school management.

At Last, I found the local people of lamagaun showing great respect and thankfulness towards DMS and "Fiends for Nepal" for its co-operation in education, Health sector and drinking water project.

Ramesh Khatiwada

Dolphin Magic School is rising as a hope in the field of education in Nepal. The people in Lamagaun have long been living in isolation where education didn't matter much. So, before Dolphin Magic School was established many children who now are studying in our school never went to any school. Also every year the number of the students in DMS is rising. As I have been a part of this organization for fourth year now, I can observe how the condition has dramatically improved in short period of time. I can feel how an idea can bring such a huge change. So, I really hope that DMS would continue giving hope to people to whom it was really needed.

I've seen the ups and downs of this organization and have felt how it rose against all odds. And I strongly believe that Dolphin Magic School will be able to continue to do so.
